PRESENTATION FOOTER

KOVA

KOVA — Confidential

Do & Don't

- ✓ DO
- DO

Always use Poppins Bold for the KOVA wordmark
- DO

Use Violet #8B5CF6 as the primary accent on all dark backgrounds
- DO

Keep the diamond mark rotated exactly 45° at all times
- DO

Maintain clear space equal to the K-height around the mark
- DO

Use Revenue Gold #F5A623 exclusively for dollar and ROI figures
- DO

Use DejaVu Mono for all data labels, eyebrows, and footers
- DO

Write the brand name as KOVA — always all-caps, no exceptions

- x DON'T
- DON'T

Rotate, stretch, skew, or apply effects to the wordmark or mark
- DON'T

Place the violet mark on a violet background — use white or navy
- DON'T

Write "Kova" or "kova" — the brand name is always full caps
- DON'T

Add the tagline everywhere — the wordmark alone usually suffices
- DON'T

Use generic fonts like Arial, Calibri, or Inter in brand materials
- DON'T

Use the diamond mark below 16px — it loses structural integrity
- DON'T

Use Gold for anything other than money figures — it loses impact if overused
